

So, you want to be an Accountant?

At Isosceles, we want to hear from graduates who are looking to train to professional accountancy status with CIMA and build a great future as an accountant.

About Isosceles

We're not a traditional accounting practice - we provide bespoke outsourced accounting, advisory, control and strategic financial support for a varied and expanding client base. While for some we are their full Finance team, we also work with clients on merger, acquisition and divestiture execution, on managing and expanding an international presence, on funding growth and achieving a high value sale.

We work with successful, growing businesses in a range of industries. While it might seem like a cliché to say we want to hear from 'dynamic and ambitious' graduates, the truth is to be recognised as a player with our clients, you'll need to match their energy, drive and focus.

You can find out more about what it's like to be one of the Isosceles team on our website.

About you

You'll have to quickly establish yourself as an integral part of both the Isosceles and your clients' teams, so you'll thrive working in a collaborative environment. To help you develop relationships at all levels, you'll be proactive by nature and your communication skills will be excellent. As an aspiring accountant, you'll have strong organisation and numeracy skills, with a natural focus on accuracy and detail. You'll have the determination needed to train to be a professional, the ambition to be a Finance Director and the self-awareness to find the right balance between your study, work and social lives.

About the role

Working with a team of professionals at various levels in their accounting career, you'll learn the full range of core accounting skills such as management of ledgers; fixed asset registers; expenses; bank reconciliations; VAT; financial reporting across P&L, variances, cash flow analysis and balance sheet, as well as getting involved in audit. You'll have exposure to and be responsible for client work from the very beginning, so you'll quickly build your own portfolio of clients and or/ areas of technical expertise.

What you need

- 2:1 degree or higher (actual or predicted). Any discipline will be considered, although ideally, you'll have studied a numeracy based subject.
- 3 A Levels (or equivalent), with at least two at Grades A*-B.
- Strong GCSE grades, including Maths and English.
- Strong IT skills and a confident user of Microsoft Office Suite, including MS Excel.
- The right to work in the UK without restrictions for the duration of the graduate scheme (3 years). We are assuming this will apply to EU nationals.

Why join us?

Isosceles is a great place to launch your career. We're trusted advisors to entrepreneurs and investors and we rely on recruiting the best talent. The difference if you work with us is, while you'll qualify as an accountant, you'll also learn to be a consultant.

Interested?

Then have a look around our graduate pages and apply with your CV and cover letter, telling us why you want to spend another three years studying and what you think you can bring to Isosceles.

Best of luck.
